Prompt Engineering and ChatGPT - Swayam Plus - ExcelR Test

1 What is the primary purpose of Generative Artificial Intelligence (AI)?

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

Analyse data

Generate content

✓ Correctly selected

Create databases

Automate tasks

2 What is the main component that makes Transformers different from RNNs and LSTMs

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

Convolution layers

Attention mechanism

✓ Correctly selected

Pooling layers

Activation functions

3 Which of the following are milestones in the development of Generative AI? 1. WaveNet by DeepMind 2. Rule-Based

Chatbots by IBM 3. GPT-2 and GPT-3 by OpenAI

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

1 only

2 and 3 only

1 and 3 only

✓ Correctly selected

2 only

4 A company is building a chatbot. They've chosen the type and selected the deployment channel. What should they do next?

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: 0 marks

Deploy and maintain the bot

Choose a technology stack

✓ Correct option (not selected)

Train the bot

Design the conversation

✗ Wrongly selected

Arrange the following major milestones in the history of NLP in the correct chronological order: 1. Introduction of deep learning and transformer models like BERT and GPT 2.

5 Development of SHRDLU, a rule-based natural language program 3. IBM's Candide system showcasing statistical language processing

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

2>3>1

✓ Correctly selected

3>1>2

1>3>2

2>1>3

6 A team is building a text predictor that must use the last two words to predict the next one. Which model should they choose?

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

First-order Markov model

Bigram model

Trigram model

✓ Correctly selected

Feedforward neural network

7 What is the main function of fine-tuning in LLM operations

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

To speed up internet connectivity

To adapt the model for specific tasks or domains

✓ Correctly selected

To reduce training data size

To improve hardware performance

8 Which GPT model was released by OpenAI in March 2023 to ChatGPT Plus paid users?

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

GPT-2

GPT-3

GPT-3.5

GPT-4

✓ Correctly selected

Which of the following methods is used in OpenChat LLM
9 for fine-tuning that incorporates both maximum likelihood estimates (MLE) and reinforcement learning (RL)?

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

SFT

RLFT

C-RLFT (OpenChat)

✓ Correctly selected

SVM

A marketing agency wants to launch a new product and
10 needs engaging ad copy and slogans. They also plan to automate customer responses using AI. Which Generative AI application would best assist them?

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

Speech synthesis

Content creation for marketing

✓ Correctly selected

Medical research

Legal document generation

11 What is the main goal of Natural Language Processing (NLP)?

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

Build hardware

Design UI

Generate human language

✓ Correctly selected

Translate code

12 Which of the following are applications or benefits of GANs in image generation? 1. Generating realistic human faces 2. Creating diverse and unique artworks 3. Mode collapse for improved image quality

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

1 and 3 only

2 only

1 and 2 only

✓ Correctly selected

3 only

13 You gave the prompt "Translate the following English text to French: " Hello, how are you?". On which principles of effective prompt engineering are you focusing here? 1. Role-play 2. Context 3. Precision

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

1 and 2 only

2 only

3 only

2 and 3 only

✓ Correctly selected

14 In customer support, prompt engineering is mainly used to

NA

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

Train employees directly

Improve the clarity and accuracy of chatbot responses

✓ Correctly selected

Fix server downtime issues

Increase internet speed

15 Which of the following best describes the architecture underlying ChatGPT?

Single correct

Marking scheme: +1 / -0

Rewarded to user: +1 marks

Convolutional Neural Network (CNN)

Recurrent Neural Network (RNN)

Transformer-based Neural Network

✓ Correctly selected

Support Vector Machine (SVM)
